Did somebody say, "cheese please"?

**O**ur products include basic grilled cheese sandwiches and one that goes as far as 24k flaked gold on the top. We have fully customizable options for those folks that are particular in the ways that they gotta have their cheese, but we also have a large menu of preconceived items for those that are ready to take a walk on the wild side.

Our business' main goal is to serve quality and delicious food to our customers in this quaint beach town.

We chose to be located on the Central Coast because, like most other joints around the area, we recognize that our customers are not from The Bay or LA.

We hope to embody a brand that chooses quality ingredients, one that has multiple options for those with dietary restrictions and a nice atmosphere that goes along our great food. Say, cheese!
